

# Product Specifications

## Walnut Stain

### Wood Stains into crystals

When mix with water, Walnut Stain dissolves into a stain that can be used to tint wood. Walnut Stain gives shades from light walnut to very dark brown.

### Preparation

The wood needs to be sanded with 120 grit, clean and dust free.

In 1 liter of tepid water, add 15 g (2 tablespoons) of Walnut Stain, mix well until there are no more solid grains. For a darker stain, increase the amount of Walnut Stain, making sure not exceeding 150 g (1 cup) per liter of water.

### Application

Apply with a stain pad, a stain applicator or a foam brush uniformly and generously on all the surface to finish. Wipe rapidly all the excess with a rag. Let dry for 2 to 3 hours.

### Application tools

- Stain Pad
- Stain Applicator
- Foam Brush.
- Cotton Rag

### Drying time

2 hours

### Covering

100 to 120 sq ft / L of preparation

### Composition

Cassel extract
